What's New In NetSnap?

Videoguard is an anti-fraud program that protects your PC from being used for fraud. Videoguard protects your PC against viruses, spyware, and hackers. The Videoguard security suite helps you discover and prevent viruses, spyware, and hackers. Videoguard Security Suite includes Videoguard Anti-Virus Protection and also includes Videoguard Internet Security Suite. The Internet Security Suite allows you to quickly scan email attachments and Web sites for spyware. Videoguard allows you to automatically and conveniently scan any attachments or URLs for viruses. You can use Videoguard to scan email attachments as they are received. This allows you to perform virus detection and cleaning as soon as the email message is received, even before it is opened. Videoguard protects your PC from viruses and spyware attacks by using three elements: The Antivirus Protection engine scans attachments as they are received. The automatic update scanner regularly scans for new viruses and spyware definitions. The browser plug-in allows you to scan your Web browser for viruses or spyware and also to monitor and remove viruses and spyware as they are downloaded. The built-in spyware remover scans your PC and removes spyware and potentially unwanted applications. Videoguard is the fastest Internet Security Suite available today. It scans emails, Web pages, and all files for viruses and spyware. In addition, Videoguard will scan for spyware and remove it if found. Videoguard Internet Security Suite scans email, Web pages, and all files for viruses and spyware. It also uses this scan to periodically check the program settings to see if the program is configured correctly. Videoguard Internet Security Suite will notify you when your programs are out of date or when your programs are being reconfigured incorrectly. By using the tool to scan your files, your PC is protected against viruses and spyware. Videoguard Anti-Virus and Videoguard Internet Security Suite do not contain spyware or virus definitions, but they do help protect you against spyware and virus attacks. If you do not use antivirus software, you can use Videoguard Anti-Virus and Videoguard Internet Security Suite to scan your files as they are received. It is an antivirus for Small business PC. It comes with a real-time scanning engine to scan a PC for any virus attacks on any system disk or files (Exe, Dll, etc.) It has a Password Manager, Registry Guard, Advanced Firewall, and Firewall System Guard. It provides a comprehensive system protection against virus, trojans, spyware, worms, dialers, spyware and malicious code. It has a powerful anti-spyware engine to prevent the spyware and adware from infiltrating your system.
